

1999 40 CFR Update Analysis Table

The following is the 1999 Update Analysis Table for the 40 CFR electronic pilot. The 40 CFR electronic pilot is structured to match the July 1, 1999, printed volumes of the Code of Federal Regulations (CFR). The following analysis table matches the 40 CFR electronic pilot structure. The files used to produce this pilot are supplied by the Office of the Federal Register (OFR). Using the analysis table legend, changes between the 1998 and 1999 CFR editions are easily identifiable. The changes between the two CFR editions are the result of amendments, revisions, additions, or deletions, published in the daily issue of the **Federal Register**. The List of CFR Sections Affected (LSA) for June 1999 is a cumulative numerical finding aid keyed to both the **Federal Register** and the CFR. The LSA allows users to track changes published since the July 1 revision date for 40 CFR. Using the LSA the affected files are identified and replaced in the CFR and properly annotated in this analysis table. Since minor editorial changes made by the OFR staff do not appear in the LSA, minor, non-substantive variations may appear between the current electronic files and the official version published by the OFR.

The 1999 structure reflects one additional volume to 40 CFR, as part of a restructuring to accommodate binding restrictions. Currently there are 24 CFR volumes comprising title 40 CFR.

The following symbols are used in the analysis table:

Brackets [] indicate new parts added.

Parenthesis () indicate replaced parts or replaced subparts, or Appendices. “Replaced” is defined as any portion of a “part,” “subpart,” or “Appendix” that has changed according to the “List of CFR Sections Affected” compiled by the OFR.

(**Restr**) indicates parts that have been “Restructured” since the July 1997 version.

R-date indicates deletion on a specific date. This is used when an effective date indicates deletion of regulations after the annual revision date.

(**DEL**) indicates deletion of entire parts.

Rsvd indicates subparts and Appendices that are “Reserved.”

(G) indicates parts containing graphics.

As a user aid, in the table of contents for chapter I each subchapter will have an identifier that indicates the status of the subchapter.

The identifiers are:

“Updating in Progress” indicates that files are currently being updated.

“1999” indicates that files have been replaced, deleted, or added for the current year.

“1995, 1996, etc.” indicates that the files have not been updated since that year, meaning no changes to that unit have been published in the **Federal Register** since that year’s edition of the CFR.

This same concept is used at the part and subpart level.

In the table of contents for each subchapter, each part will have an identifier that indicates the status of that part after the part number (i.e., Part 0 (Updated 1999) -). The identifiers are:

“Updated 1999”

“Added 1999”

“Deleted 1999”.

Parts that are deleted during the year will be removed from the electronic CFR, but the title and the identifier “Deleted 1999” will remain until the next year’s CFR edition. The status of subchapters, parts, and subparts with no note can be checked against the analysis table to verify if an “updated” file is pending.

For further explanation of the analysis table, see “About the 40 CFR Analysis Table.”

The 40 CFR chapter I electronic pilot files are available in portable document format (PDF). The files are not available in HTML format due to the equations and graphic files. For further information, see “About PDF Files.”
